

Roosevelt gave away 75 free water bottles and saved 80 plastic bottles from landfills during a two-hour lunchtime promotion on Jan. 7 near the Schaumburg Campus Wellness Center. The event showcased the new "EZH2O to Go" water fountain which dispenses cold filtered water three times faster than a standard drinking fountain.

Students can now save money by eliminating bottled water purchases, and enjoy better tasting and more sanitary water than most bottled waters. Roosevelt has installed one of these new fountains as a test and has plans to replace older fountains over time at both campuses.

They track the number of 16 oz. plastic bottles removed from the landfill, are touch-less and use silver ion anti-microbial product protection which inhibits bacterial growth.
